## OBJECTIVE

---

Seeking a challenging position where I can leverage over 2.5 years of hands-on experience in Java, Oracle PL/SQL, and Spring. Proficient in Agile methodologies and repositories like GitHub, I aim to contribute effectively to dynamic projects. Committed to delivering high-quality software solutions while advancing my skills in software development and collaborative team environments.

## TECHNICAL SKILLS

---

<b>Languages</b>	Java, Oracle PL/SQL
<b>Frameworks</b>	Spring
<b>Tools</b>	Cronacle Redwood, BMC Remedy, Spring Tool Suite, Octane, HPALM, SQL Developer, WinSCP, Putty, SoapUI, DBeaver, Microsoft Visual Studio Code
<b>Repositories</b>	GitHub

## EXPERIENCE

---

### INFOSYS

Senior Systems Engineer  
Systems Engineer

Jan 2024 – Present  
Nov 2021 – Dec 2023

### PROJECT

#### Southern California Edison

SCE is the largest subsidiary of Edison International and the primary electric utility company for much of Southern California. It provides 15 million people with electricity across a service territory of approximately 50,000 square miles. We support client applications which does daily energy and price forecast for southern part of California.

#### Technologies

Java, Spring, Oracle PL/SQL

#### Key Responsibilities

- Develop Java, Spring applications to create fully automated client management systems through SOAP API, lead the application development process through analysis of the system requirements.
- Design and develop new solutions for clients following Agile methodologies.
- Develop Oracle PL/SQL packages, procedures and functions.
- Identify and troubleshoot issues in existing code and resolve them.
- Assist technical lead in defining architecture.
- Mentor and guide team members to achieve project goals.
