Professional Summary

Java Developer with **4.7+ years** of experience in **Java, Spring Boot, Microservices, SOAP/REST APIs, SQL, and Oracle**. Experienced in backend development, production support, incident resolution, application modernization, and Agile development. Proficient in delivering scalable, secure, and maintainable enterprise applications.

Technical Skills

Languages: Java, SQL

Frameworks/Technologies: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Junit, Docker

Web Services: SOAP APIs, REST APIs

Architecture: Microservices

Database: Oracle

Version Control: Git, GitHub

Deployment: Azure Devops

Tools: Postman, STS, IntelliJ, VS Code, DBeaver, GitHub Desktop, Cronacle Redwood, BMC Remedy, Service Now

Scripting: Bash

Operating Systems: Windows, Linux

Professional Experience

I.T. Analyst / Tata Consultancy Services / April 2026 – Present

Canadian Imperial Bank of Commerce

- Provided production support for a mortgage processing application built using **Angular, Spring Boot, REST APIs, and SQL**. Resolved production incidents, implemented backend bug fixes, troubleshoot **REST APIs**, databases, and upstream/downstream integrations, analyzed application logs, and supported **Azure DevOps** deployments while ensuring **SLA compliance**.

Technology Analyst / Infosys Limited / November 2021 – April 2026

Uniper Energy:

- Worked on vulnerability remediation for a Java 8-based shared library used by multiple upstream and downstream applications. Identified and resolved issues by upgrading vulnerable dependencies and applying secure coding practices while ensuring backward compatibility. Managed builds and deployments through **Azure DevOps** CI/CD pipelines and collaborated with dependent application teams to validate changes and ensure smooth, impact-free releases.

Java 8 to 21 Migration:

- Migrated enterprise applications from **Java 8 to Java 21** by resolving dependency issues, updating Maven configurations, replacing deprecated APIs, validating compatibility, and optimizing application performance.

Southern California Edison:

- Developed and maintained scalable applications using **Java, Spring Boot, Hibernate, and JPA**. Designed and integrated **SOAP APIs** to enable inter-service communication. Developed Oracle **PL/SQL procedures, functions, and packages**.
